

FARM TECHNOLOGY

Improving your farm business

The Riverina Highlands Landcare Network is partnering with Riverina Local Land Services to deliver the popular Farm Technology Workshop—Getting the most from your Smart Phone/Tablet in your farming business.

The interactive sessions will cover:

- Social media & mobile technology in your farming business
- Device capabilities: Pros vs. Cons, Security & Privacy
- Recording information and how to share using Cloud and other technology
- Useful Apps for farmers – how to compare apps

Participants are encouraged to bring along their own smart phone and tablets. The workshop will also be an opportunity to learn from one another and share experiences using social media and mobile technologies on-farm.

The event will conclude with a brief session on the Spring 2014 seasonal outlook with a discussion on pasture and livestock opportunities and issues.

The workshop will start at 12.30pm at>>>Lunch provided

This workshop will cover useful farm apps, value of social media for agricultural enterprises and use of mobile devices for farm record keeping.
